

Choosing The Right Setup For Your Workforce

Every institution and sector has different technology requirements based on its performance, security, manageability, and AI needs.

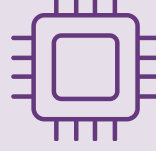

K-12 Education			
 Day-to-Day Workflow	 Tech Pain Points	 Tech Requirements	 Where AI Fits
• Lesson planning • Teaching • Student evaluations • Video collaboration • Remote learning	• Supporting different workload needs • Managing devices at scale • Adopting new technology	• Reliable performance • Secure device management • Collaboration tools • Remote and AI capabilities	• Personalize learning • Speed up content creation • Improve collaboration
 AMD Fit	→ AMD Ryzen Pro - Performance, security and managability → AMD Ryzen AI Pro - dedicated NPU for on-device AI		

Higher Education			
 Day-to-Day Workflow	 Tech Pain Points	 Tech Requirements	 Where AI Fits
• Administrative work • Teaching • Data analysis and collaborative research • Engineering and technical work	• Matching devices to each role • Maintaining a consistent IT environment • Supporting everyday tasks + research and engineering computing	• Scalable computing power • Advanced device and data security • Local AI processing	• Accelerate research and data analysis • Assist teaching and content creation • Streamline admin work
 AMD Fit	→ AMD Ryzen Pro - Everyday computing → AMD Ryzen AI Pro - Support local AI apps → AMD Ryzen Threadripper Pro - Advanced workstation workloads → AMD EPYC - Data center infrastructure		

State and Local Government			
 Day-to-Day Workflow	 Tech Pain Points	 Tech Requirements	 Where AI Fits
• Public and resident communication • Case management • Planning and data analysis • Office, remote and field Work	• Protecting secure information • Deploying devices across differing department needs • Supporting users in different fields and physical locations	• Reliable daily performance • Advanced security & fleet management • Flexible computing options • PC infrastructure support	• Simplify case management • Accelerate data analysis • Improve public communication
 AMD Fit	→ AMD Ryzen Pro - Endpoint computing options → AMD Ryzen AI Pro - On-device AI apps for better data security		

Turn your technology needs into the right device strategy with Sehi.
